3M Innovation

The Scotchgard™ Roofing System is the single most effective algae resistant solution available.

Roof with the Scotchgard™ AR Roofing System installed 1994.

See the Scotchgard™ AR System difference for yourself.

Roof with the Scotchgard™ AR Roofing System installed 1992 and never washed.

There's only one algae resistant roofing system effective enough to earn the Scotchgard™ name.

Compare the results on this roof installed in 1996 and never washed. The left side with Scotchgard™ AR Roofing System is like new and algae free. The right sides streaked after just a few years.

Important Benefits Of The Scotchgard™ Algae Resistant Roofing System

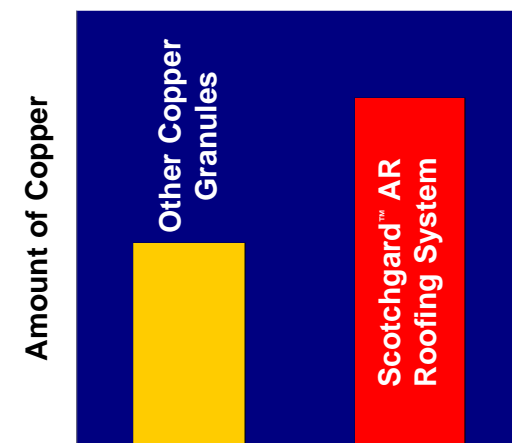

- The confidence of having chosen quality roofing shingles made with the brand that means “protection.”
- A roof that maintains an aesthetic appearance, enhancing a home’s overall visual appeal.

Why The Scotchgard™ AR System Is Better

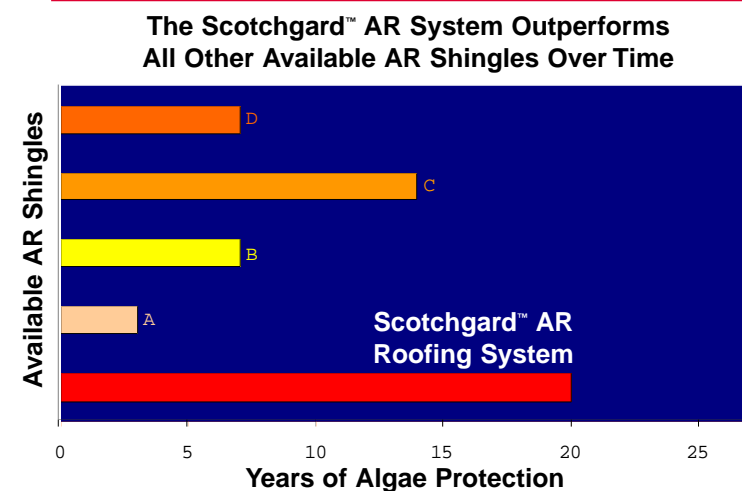

- Scotchgard™ algae resistance for asphalt shingles offers an affordable and effective long-term solution available for maintenance-free roof protection.
- Copper roofing granules stop algae. But not all copper granules are created equal. 3M copper granules use a greater amount of copper than any other competitive copper granule.
- When uniformly distributed across the surface of a shingle in combination with standard colored granules, the Scotchgard™ Algae Resistant Roofing System is your assurance that the beauty of your roof will remain free from algae stains.

See for yourself in above photos.

All Copper Granules Are Not Created Equal

- Lower long-term maintenance costs without repeated cleanings over the life of a roof.

- Expanded options in shingle color selection without having to choose black to hide algae stains.
- Environmentally correct—no harm to animals, plants or shrubs from using bleach or caustic fluids to remove algae stains.

Talk To Your Quality, Professional Roofing Contractor

A new roof is an important investment. To learn more about how shingles with the Scotchgard™ Algae Resistant Roofing System can preserve the value of that investment, talk to a professional roofing contractor. He'll be glad to tell you which brands have the Scotchgard™ Algae Resistant Roofing System, explain their warranty and estimate costs.
